

Android Online Training

1 What Is Android?

Brief History of Embedded Device Programming
Open Handset Alliance and Android
Introduction to Android

2 Downloading and Installing Eclipse

Why Eclipse?
Downloading and Installing the JRE
Downloading and Installing Eclipse

3 Downloading and Installing the Android SDK

Downloading the Android SDK
Downloading and Installing the Android Plugin for Eclipse
Configuring the Android Plugin for Eclipse

4 Exploring the Android SDK

What Is in the Android SDK?
Android Documentation
Android Samples
Try This: Run the API Demos Sample Application
Android Tools
APIs
Application Life Cycle
Standard ASP Application Life Cycle
Android Application Life Cycle

5 Application: Hello World!

Creating Your First Android Project in Eclipse.
Examining the Android-Created Files
AndroidManifest.xml
Referenced Libraries
Directories
Hello World! Again
Hello World! Using an Image
Hello World! Code-Based UI
Hello World! XML-Based UI

Try This: Use TextView and ImageView

6 Using the Command-Line Tools and the Android Emulator

Creating a Shell Activity Using the Windows CLI

Running the ActivityCreator.bat

The Project Structure

Creating the Hello World! Activity in the Windows CLI

Editing the Project Files

Adding the JAVA_HOME Variable

Compiling and Installing the Application

Hello World! on Linux

Configuring the PATH Statement

Try This: Create an Image-Based Hello World! in the CLI

7 Using Intents and the Phone Dialer1

What Are Intents?

Using the Dialer

Placing a Call from Your Activity

Adding the Intent to Your Activity

Editing Activity Permissions

Modifying the AndroidPhoneDialer

Adding a Button6

Implementing an EditText View

Try This: Modify the AndroidPhoneDialer Project

8 Lists, Menus, and Other Views

Building the Activities1

Intent Code for the .xml File

Intent Code for the .java File

Modifying the AndroidManifest.xml

Using the Menu

Creating the Activity for AutoComplete63

Button

CheckBox

EditText

RadioGroup

Spinner

Try This: Modify More View Attributes

9 Using the Cell Phone's GPS Functionality

Using the Android Location-Based API

Creating a kml File

What Is a track File?

Getting the nmea File in Windows

Getting the nmea File in Linux

Reading the GPS with the Android Location-Based API

Creating the AndroidLBS Activity

Passing Coordinates to Google Maps

Adding Zoom Controls

Try This: Toggling Between MapView's Standard and Satellite Views

10 Using the Google API with GTalk

Configuring the Android Emulator for GTalk

Implementing GTalk in Android

Creating the Activity's Layout in the GoogleAPI.xml

Adding Packages to GoogleAPI.java

Implementing the View.OnClickListener

Compiling and Running GoogleAPI

Try This: Add a Settings Feature to Your GoogleAPI Activity

11 Application: Find a Friend

Creating a SQLite Database

Creating a Custom Content Provider

Editing the strings.xml

Creating Your Content Provider

Creating the FindAFriend Activity

Editing AndroidManifest.xml

Creating the NameEditor Activity

Creating the LocationEditor Activity

Creating the FriendsMap Activity

Creating the FindAFriend Activity

Running the FindAFriend Activity

Try This: Real-Time Location Updating

12 Android SDK Tool Reference

Android Emulator Commands

Android Debug Bridge Commands
